WORK EXPERIENCE

Delhi , India   Myinstapass Business Solutions Pvt Ltd. , INTERN   **Feb 2019 - April 2019**

- Worked as an intern for developing their IOS App and deploying it onto the app store.
- Designed and developed several apps for the company where any authorized client can book meeting halls for his/her company , also report for any issues in the working of any equipment or in any normal proceedings and it also had a community page with a chat feature to have interaction between different members of the company.
- It had an integrated payment gateway with a system generated Invoice after every successful payment.

Mumbai, India   Try Catch Classes   **April 2019 - July 2019**

- Worked as a Senior Intern for developing and designing a full fledged app for them
- Its an informative app where any student willing to learn programming can go through the courses details provided and if interested can enroll.
- It also trained the students for interviews and providing tricky interview questions , but however this feature was only available to their students.
- Also u can upload your resume and get notified with any job opportunity as when posted by the classes.
- Developed and published various other small apps.

PROJECTS

Brskly and Delhi Co

- IOS Application where the client can book meeting halls for his/her company , also report for any issues in the working of any equipment or in any normal proceedings and it also had a community page with a chat feature to have interaction between different members of the company.
- It had an integrated payment gateway with a system generated Invoice after every successful payment.

Try Catch Classes

- Its an informative app where any student willing to learn programming can go through the courses details provided and if interested can enroll.
- It also trained the students for interviews and providing tricky interview questions , but however this feature was only available to their students.

E-book Store

- Django based web application. By this application any user who visited the website can read any novel sorted with genre , top trending and rating.
- He can also save novels for later and the complete history of which book the user reads is tracked at the back giving him suggestions of related novels.

Quiz Application

- Web Application with Node.js and an online database MongoDB.

- It had three major features - one was a practice mode where any user can take n number of practices to improve his/her knowledge , second mode was a competition was a user can compete in a quiz competition with any of his/her friends , third mode was a KBC in which 4 players were allowed to play among which only one player could continue with the game.

DJCSI
